SUMMARY

Forward-thinking Software Engineer with a strong background in full-stack development. Skilled in a broad range of technologies, strongly emphasizing improving user engagement and enhancing system performance. See my Portfolio

WORK EXPERIENCE

Software Engineer

100Devs

Jan 2022 – June 2024 || LA, California (Remotely from Nigeria)

- Collaborated with software development and testing team members to design and develop robust solutions, ensuring functionality, scalability, and performance.
- Reviewed project specifications, designed technological solutions, and communicated project milestones to internal and external stakeholders.
- Led successful integration of multiple third-party APIs.

Software Engineer

Freelance

March 2023 - Present || Delta State, Nigeria

- Laundry Management System: Built FincCleanApp's laundry management system and website on par with CleanCloud's.
- Historical Equity Dashboard: Developed market watch feature for ATAfrica across multiple trading accounts connected to MetaTrader5.
- Company/Portfolio Websites: Designed and developed custom websites for various clients.

PROJECTS

Jollify (A music streaming app. https://jollify.vercel.app)

Full Stack Developer

September 2023 – Current

- Led the development of a progressive web app for music streaming, featuring seamless user experience and playlist management.
- Utilized MERN stack and optimized scalability through API-driven architecture.
